

YARD SAFETY POLICY

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Personal Protective Equipment (PPE) must always be worn when in our yard. Required PPE includes a reflective safety vest along with proper company issued identification.

During winter months, shoe grippers must be worn when walking surfaces are slippery. Drivers can identify the requirement to wear grippers by a visual RED LIGHT that is affixed to our building. It is visible from the entrance of the yard for the visual cue. Sanding of the yard surface will be provided when required.

BUSES IN YARD

SAFELY HOME – Prior to departing our yard, drivers MUST perform a radio call to base to indicate their departure. Similar procedure is required when returning to base by calling “Safely Home” which will indicate their safe return to base.

PARKING & REVERSING

All company operated vehicles in our yard MUST honk prior to reversing. This includes our light vehicles as well. Vehicles equipped with a reverse audible system are also required to follow this process.

YARD SPEED IS 10 KM/H FOR ALL VEHICLES
